

To Whom this may Concern at the FCC,

We need Air 1 if for no other reason that the youth of our nation deserve to know the truth that God loves them. We get Air 1 commercial free, it is listener supported. If Air 1 were no longer accessible in our area, this could significantly hinder it's overall ability to operate.

Here in Eugene, Oregon, we need Air 1 @ 90.3 & 90.7 FM. There are few stations that we can tune into where we are not bombarded by undesirable programming that is unsuitable for our children. My oldest Son loves to hear Air 1 and his Mom and I do not have to worry that he is going to be inundated with negative world view programming.

I implore you not to make the changes (displace Air 1 by an LPFM broadcaster) that would cause us to be unable to tune into our favorite Radio Station, Air 1. It is in the public's interest to preserve the service provided by Air 1 because it offers a positive alternative to the mainstream commercial programming in our area.

Thank you for hearing my comments
